But they are not mass-produced; the only way to get one is to build it yourself or have it custom-built. Bruce Roberts-Goodson has been designing and building metal boats for more than three decades, and in *The Complete Guide to Metal Boats* he tells you all you need to know to start building the boat of your dreams. How to build or refurbish hulls, decks, and superstructures How to prevent corrosion Building from plans or pre-cut kits Sample designs for sail- and powerboats This updated and expanded new edition also gives you a bonus CD with many study plans and 1,500 kit-assembly photos—the equivalent of a shop manual for metal boat building.
